***Interstellar* Movie Analysis and Critique**

Astronomy

The movie *Interstellar* is a science thriller centered on the exploration of another sustainable planet to continue the survival of the human race. Key factors in the movie include the scientific understanding of space time, sustainability, and gravity. This is where we come in! Jot down notes in regards to how the movie addresses these three topics and supporting details for them. As scientific as *Interstellar* is, it has undergone some scrutiny in regards to how scientifically accurate the information is. What's your insight?

Directions:

You will be writing a two page (minimum) critique of the movie using details to support your claims for each of the following concepts:

- space time
- sustainability (for life)
- gravity

Requirements:

1. a minimum of two **full** pages typed
2. double spaced
3. 12 point font
4. standard font
5. 1 inch margins
6. a minimum of 3 sources cited in MLA format
7. Name, period, and date at the top with title

Needed to be Included:

1. 3 supporting details (situations) from the movie **for each** of the following topics above
 - *Hint: Each topic should get its own paragraph with both an introduction paragraph and a conclusive one. This totals five paragraphs and a solid two pages if completed correctly.

Scoring:

50 points!

- 10 points for each topic with the inclusion of 3 strong, supporting details from the movie
 - o a total of 30 pts
- 10 points for correctly following the requirements listed above
- 5 points for correct grammar, punctuation, and spelling
- 5 points for correct MLA formatted citations (minimum of three)

Due Date: _____

Need Help?

Even though the movie is copyrighted and unable to be uploaded to the website, there are many great sites out there that provide the entire plot breakdown of the film and also information in regards to the topics above. Questions? Ask away!!
